SNS SA NR. 4583/11.08.2026

To potential bidders,

Regarding The procurement of 2 (two) salt block cutting machines for the E.M. Rm. Vâlcea and Târgu Ocna branches

Clarifications no. 1

Question 1: We would like to know if it is possible to postpone the bid closing date (at least one week later) through an amendment.

Answer: We agree to the postponement of the deadline for the submission of offers, as follows:

Deadline for receipt of bids: September 15, 2026, at 10:00 a.m.

Date, time, and location for opening bids: September 15, 2026, at 12:00 p.m., Splaiul Unirii, nr. 76, Corp A, etaj 5, Sector 4, Bucharest.

Question 2: We need to include some spacers in the supply : please let us know if is requested an other dimension in addition to 40X20X20 cm and 20x20x10 cm.

Answer: The only sizes of salt blocks that will be cut will be 40x20x20 cm and/or 20x20x10 cm.

Question 3: Cutting machines include only two disc types (1 for vertical cutting and 1 for horizontal cutting).

Answer: This requirement is necessary for the proper sizing of the motor for vertical cuts. In the worst-case scenario, this motor will have to provide the power needed to cut simultaneously with four vertical discs (of the same type), as specified in the specifications.

Question 4: Please clarify the meaning in *adjustable cutting feed* if you mean machine advance speed on the railway (requested at least 6m/min) or cutting disc speed (RPM: revolutions per minute).

http:// www.salrom.ro e-mail: secretariat@salrom.ro

Answer: This refers to the adjustable cutting speed during feed, taking into account the fact that the density of the salt is not constant throughout the cutting process.

Question 5: Regarding the clarification stating that *The supplier must provide a corrosion warranty for the entire service life of the equipment (minimum 5 years). A warranty statement/certificate must be submitted, detailing the corrosion protection measures adopted by the manufacturer*, This may be supplied only together with a maintenance program that also includes the replacement of critical components.

Answer: In order to be eligible for the corrosion warranty we accept a maintenance program to be carried out over the 5-year warranty period.
